BEARING SOLUTIONS FOR THE AGRICULTURAL INDUSTRY

Utilizing

AG TREME

Technology

AG TREME

AGXTREME™

Today's agricultural industry demand is higher than ever for products that will keep the farmers equipment in the field, operating continuously. Farmers are operating equipment longer, faster and harder and will continue to push the boundaries to increase production. In order to support the top OEM manufacturers of farm equipment, PEER has developed the AGXTREME™ product portfolio.

SEEDXTREME™ offers improved bearing solutions to support manufacturers of seeding equipment. Using our patented seal design and optimized internal bearing construction, PEER offers a range of bearings specifically designed for gauge wheels, disc openers and closing wheels, including integrated flange and shaft HUB design.

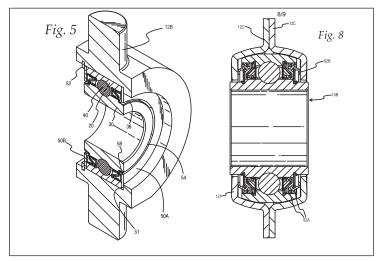

The AGXTREME™ portfolio consists of the TILLXTREME™, SEEDXTREME™ and TURFXTREME™ product offerings.

Proven through years of research, development and rigorous testing in both lab and field, the advanced sealing technology ensures optimal performance for the customer.

TILLXTREME™ offers a one of a kind, exclusive high-performance solution designed to eliminate the need for relubrication, saving precious hours needed for field work. PEER's patented seal design provides significantly improved contamination exclusion than the conventional triple lip seal design. Products include trunnion units for gang disc, HUB units for independent disc, and both stamped steel and ductile iron units for rolling basket applications.

PEER's TILLXTREME™ engineered assemblies are more reliable, maintenance-free, and simplify installation. As an environmentally friendly solution, there is no grease purge to contaminate the soil.

Patent-granted: EP2452090 | US9157475

Whether you have to produce equipment that runs faster or carries higher loads to cover the growing requirements for higher field productivity PEER SEEDXTREME $^{\text{m}}$ bearings have been designed to outperform the competition. These drop in replacements eliminate the need for redesign and increase your speed to market.

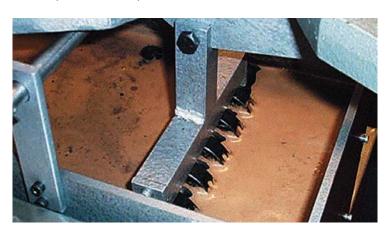

TURFXTREME™ offers the Lawn and Garden industry the highest performance bearing seal to provide contamination exclusion and substantially increases the life of lawn and garden equipment, requiring less frequent customer maintenance and greatly reduced cost of machine ownership.

AGXTREME™ Product Validation

Lab Testing / Mud Slurry Testing

PEER's Research and Development Center utilizes mud slurry testing to thoroughly study new seal concepts before extensive field tests are conducted to validate application performance. The test is performed to determine the effectiveness of the bearing sealing device to provide significantly improved contamination exclusion under aggressive environmental conditions. Seal designs are tested against competitive parts in side-by-side mud slurry.

About PEER.

Since 1941, PEER Bearing has grown into an industry leader offering a wide range of highly engineered, precision bearing products. With a strong focus on the agriculture industry, PEER manufactures, develops, and engineers bearing solutions to global market leaders. The PEER product range includes the most comprehensive offering for all agricultural implements, combines and tractors. Our bearings will meet mounting requirements on your equipment to provide an easy drop-in replacement.

From mild to harsh conditions, PEER manufactures high-performance bearings that maximize productivity, increase uptime and eliminate daily maintenance operating costs. Supplying award winning, precision tailored solutions for agricultural equipment starts with an in-depth knowledge and evaluation by industry-specific application engineers. Bearing requirements are translated into engineered solutions, manufactured at our ISO/TS 16949 certified facilities and validated through lab and field testing. With facilities in North America, Europe, Latin America and Asia, we provide solutions for farmers, grounds maintenance and landscapers globally that you can rely on at every turn.

Here is what our customers are saying about their experience with PEER AGXT-REME Bearings:

"After one season in Russia, the TILLXTREME $^{\text{TM}}$ in the tillage discs performs MORE THAN TWO TIMES better than the previous GREASE relube solution."

Luca Rigon, Engineering Manager Tillage Equipment, Maschio Gaspardo

"The TILLXTREME[™] passed 2011 and 2012 tillage seasons in the rolling basket application without any failure and perform way better than the previous solution."

Cyril Thirouin, Engineering Director *Grégoire-Besson, Rabe Agri*

"The maintenance-free bearings offered by PEER Bearing offer significantly improved bearing life over the traditional bearings being used."

Ben Covell, Product Development ManagerGreat Plains

Year After Year, PEER Bearing Offers Award-Winning Manufacturing, Quality and Delivery

PEER® Bearing offers

- A comprehensive and wide range of bearings, radial ball bearings and tapered roller bearings
- Advanced technological solutions for all kinds of applications
- ISO/TS 16949 certified production facilities
- A scalable research and development center
- · World-wide and international customer and application support

SEEDXTREME™

Bearing solution for seeding equipment

Benefits and functional features

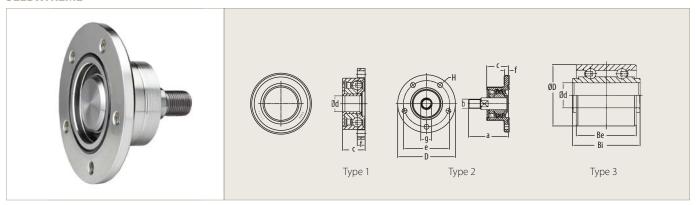

- Increased productivity and bearing life in field
 - ⇒ Exclusive patented seal design with improved contamination exclusion extends bearing life and can be paired with upgraded, wear-resistant disc blades
 - ⇒ Pre-assembled, engineered HUBs reduce assembly and labor cost while eliminating bearing damage due to incorrect component design and assembly
- Increased speed to market
 - ⇒ SEEDXTREME™ covers all critical row unit bearings from coulter disk to the closing wheel

Flanged Unit Assembly for Rolling Basket Stamped Steel Rolling Basket Bearings More Productivity and Environmentally Friendly

It takes time and money to maintain traditional tillage bearings. TILLXTREME™ solutions are maintenance free which keeps the machine working in field instead of sitting idle for service allowing for up to 15% more productivity for the farmers. This can result in up to 25 more tilled acres (10 ha) per day and a significant saving in material and labor cost.

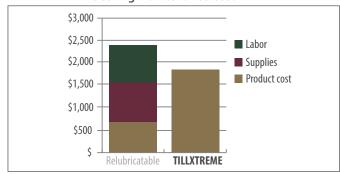

* the chart reflects estimated savings when Trunnion and FD units are mounted. Based on internal calculation and estimated total savings. Actual results may vary.

Benefits and functional features

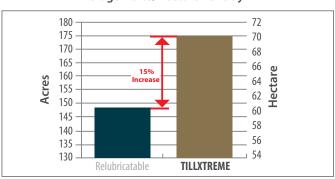

- Bolt-on-performance
 - ⇒ Directly interchangeable industry standard units
 - ⇒ Static misalignment capability accommodates imprecise mounting surfaces
- Increased productivity and bearing life in field
 - ⇒ Dynamic misalignment capability eliminates internal bearing damage and housing wear
 - ⇒ Shock load protection due to thick riveted steel housings
 - ⇒ Exclusive patented sealing system eliminates the need for relubrication
- Increased speed to market
 - ⇒ PEER offers the industry's largest range of round and square bore sizes

Flanged Unit Assembly for Rolling Basket Ductile Iron Rolling Basket Bearing

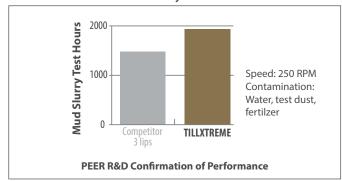

It takes time and money to maintain traditional tillage bearings. TILLXTREME™ solutions are maintenance free which keeps the machine working in field instead of sitting idle for service.

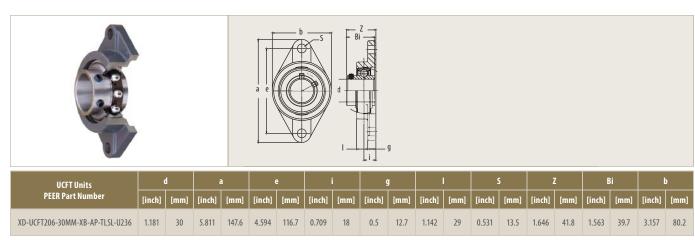

Benefits and functional features

- Bolt-on-performance
 - ⇒ Directly interchangeable industry standard units
 - ⇒ Compensates misalignment from imprecise mounting or frame surfaces
- · Increased productivity and bearing life in field
 - ⇒ Shock load protection due to high grade ductile iron housing
 - ⇒ Exclusive sealing system eliminates the need for relubrication

HUB Bearings

Bearings for Independent Disc Applications

It takes time and money to maintain traditional tillage bearings. TILLXTREME™ solutions are maintenance free which keeps the machine working in field instead of sitting idle for service.

Benefits and functional features

- Bolt-on-performance
 - ⇒ The integrated flange design replaces an external housing
 - ⇒ Reduces labor cost and eliminates damage due to incorrect assembly
- Increased productivity and operation life in field
 - ⇒ Shock load protection from forged steel integrated flange
 - ⇒ Eliminates internal bearing damage
 - ⇒ Exclusive patented sealing system eliminates the need for relubrication
- Increased speed to market
 - ⇒ PEER offers the industry's largest range of high performance tillage HUBs

Cap and O-Ring

Effective static seal system on disc side

Labyrinth Seal Lip Design

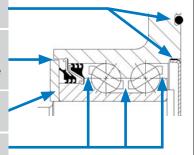

- Contamination exclusion for extreme environments
- No relubrication maintenance required

Heavy Washer

 Protect seals from heavy stones and debris

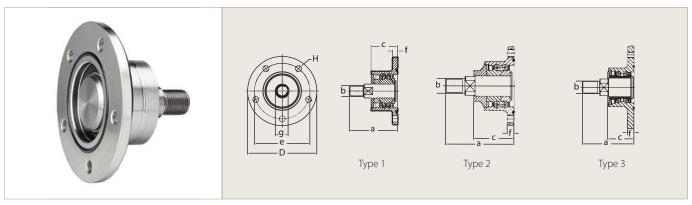

Independent Lubricant Zones

· Increases lubrication life

TURFXTREME™

Bearing Solutions for Lawn & Garden Equipment

Benefits and functional features

- · Long bearing life results in
 - ⇒ Less customer maintenance and reduced cost of machine ownership
 - ⇒ Reduced OEM warranty exposure and cost
 - ⇒ Strengthened OEM product and brand integrity

f machine The second of the s

PEER Mud Slurry Test Results

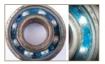

Feature	Benefit
Contact sealed for life	Contamination prevention
High quality through hardened bearing steel	• Improves fatigue life
Precision ground and superfini- shed raceways	• Reduces vibration and extends life
Premium polyurea thickened grease	Excellent high and low temperature capability Excess grease life
Increased grease fill	• Improves corrosion protection during machine idle periods
Premium nitrile seal material composition	• Longer seal life due to improved high temperature and wear resistance
Optimized seal design	Maintains seal integrity when exposed to external force due to wrapping debris and pressure washing
Presicion ground seal contact surface	Smooth surface finish results in longer seal lip life Improves ring concentrity which results in increased seal effectiveness
Increased seal lip contact	Improves contamination exclusion in extreme environments
Heavy gauge steel shroud	Protects seal from large solid contamination (stones, pebbles, dirt)

Typical Standard Ball Bearing Seal (32 hours)

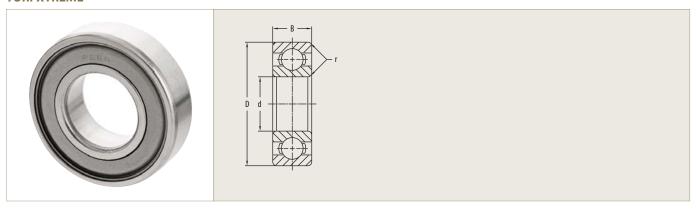

Competitor Seal for L&G Applications (32 hours)

PEER 2RSTFP Seal (32 hours)
